Some people need money more than we do. For example, some people have lost their homes due to natural disasters or war, while others don't have enough food or clothing. So this year, for our birthdays, let's tell our friends and family to donate money to a charity instead of buying us presents. I know that some kids might not want to give up their birthday presents, and I understand. However, remember that we can live without new toys or games more easily than someone can live without food, clothing, or shelter. So, we should tell our friends and family that, for our birthdays this year, we want to give to others.

When you skip breakfast, you are like a car trying to run without fuel. Experts say that a nutritious breakfast is the brain's fuel. A brain that is fully fueled concentrates better and solves problems faster. Some students say that getting a few extra minutes of sleep is more important than eating a bowl of oatmeal, but they're wrong. Of course, sleeping is important, but going to bed a half-hour earlier would be better than sleeping late and skipping breakfast. For students who want to do well in school, breakfast is the most important meal of the day. Give your brain the fuel it needs to run well. To think more clearly and faster, eat a good breakfast.

Dr. John Ross was well-known for helping his patients. Many of his patients were poor farmers, and they could not always afford to pay Dr. Ross's small fee. The girl's family had run out of the firewood they needed to keep their tiny house warm. Dr. Ross grabbed a spare blanket from his car and told the father to bathe his daughter's forehead with cool water. Then Dr. Ross left to take care of other patients. After

Problems can appear to be unsolvable. We are social animals who need to discuss our problems with others. When we are alone, problems become more serious. By sharing, we can get opinions and find solutions. An experiment was conducted with a group of women who had low satisfaction in life. Some of the women were introduced to others who were in similar situations, and some of the women were left on their own to deal with their concerns. Those who interacted with others reduced their concerns by 55 percent over time, but those who were left on their own showed no improvement.

31. Armand Hammer was a great businessman who died in 1990 at the age of ninety-two. I never wake up without being full of ideas. Everything is a challenge." George Bernard Shaw, one of the most successful writers of all time, said something similar about a hundred years earlier. This is not the case for people who live in the suburbs.

For the most part, people who live or work in cities walk throughout the day—to go from the parking lot to the office, to shop, and to run errands. ( ① ) It's often easier and cheaper to walk a few blocks than to wait for a taxi or subway. ( ② ) In this way, exercise can be structured into the daily routine. ( ③ ) Because the suburbs are spread out, it's too far to walk to the office or run to the store. Natural boundaries between states or countries are found along rivers, lakes, deserts, and mountain ranges. Among them, river boundaries would seem to be ideal: they provide clear separation, and they are established and recognized physical features. In reality, however, river boundaries can change as rivers change course. Following flooding, a river's course may shift, altering the boundary between states or countries. For example, the Rio Grande, separating the United States and Mexico, has frequently shifted its course, causing problems in determining the exact location of the international boundary.

A river seems to be ideal in \_\_\_(A)\_\_\_ boundaries, but in fact it isn't, because its course is \_\_\_(B)\_\_\_.

A few years ago, I asked two groups of people to spend an afternoon picking up trash in a park. I told them that they were participating in an experiment to examine the best way to make people take care of their local parks. One group was paid very well for their time, but the other was only given a small amount of cash. After an hour of hard, boring work, everyone rated how much they enjoyed the afternoon. You might think that those who earned a lot of money would have been more positive than those who earned very little.

In fact, the result was the exact opposite. The average enjoyment for the well-paid group was only 2 out of 10, while the poorly paid group's average rating was an amazing 8.5. It seemed that those who had been paid well thought, "Well, people usually pay me to do things I dislike. I was paid a large amount, so I must dislike cleaning the park." In contrast, those who received less money thought, "I don't need to be paid much to do something I enjoy. I worked for very little pay, so I must have enjoyed cleaning the park." According to the result of this study, it seems that giving excessive \_\_\_\_\_ may have a negative effect on the attitude of the people doing the work.

My husband David called me on my cell phone the week before our daughter's wedding and said, "We have a problem." He told me that the electric company announced a future power outage in our neighborhood to allow for a major repair. The real problem was that we were going to have the power outage on the day of the wedding.

\* power outage: 정전

(B)

So we got up early on Sunday morning, and found a generator parked right outside of our house—it was (a) her solution. That's right—our house was connected to electricity all day from our own private generator while the rest of the neighborhood had a blackout! It was amazing. Rosa made it clear that our happiness was important to (b) her as well. There are truly people with big hearts. Kindness is still alive.

\* generator: 발전기

(C)

I called the electric company to ask, or rather to beg, them to put off the repair work since we really, really needed our house to prepare for the wedding (makeup, hair, etc.). I was immediately transferred to a manager named Rosa. She understood the problem and explained that they absolutely couldn't reschedule the power outage, but (c) she would see what she could do.

(D)

Two days later, Rosa called to say that they could not let only our house keep its electricity. Then she said, "We can let you use a room in our company's building."
